System Information:

- 1. There was one water leak reported for the month of August 2016. This leak was located 2413 Lebec Rd, the leak was on the joint of an 8" main. The main line was repaired with a joint repair clamp. "See attached pictures"
- 2. All bacteriological samples returned an absence for coliform bacteria for the month of August 2016.
- 3. Source monitoring for Lebec's wells returned an absence for ecoli. Quarterlies for general chemistry, and metal analysis have been completed.
- 4. The drivers right tire ruptured, and blew out. The tread detached from the side wall leaving extensive damage to the driver's side of the Chevy truck, insurance has chosen to cover the damage. It is being repaired by Mountain Auto Body. The tires on the Dodge have been replaced with new BF Goodwrench All/Terrains, due the age of the tires, and amount of tread left. "See Attached Pictures of the tread of the old tires."
- 5. I have attached pictures of the Lebec, and State well clean up and gravel installation. "See Attached photos"
- 6. Terry from Power Tech Electric has completed the electrical panel clean up, and repair of the undersized wires feeding the pump motor. "See Attached Photos"
- 7. As mentioned in previous meetings, attached is a description of deficiency list provided by the State Water Resources Control Board. I have highlighted the items in yellow that have been completed.

All other systems are functioning as they should, Thank You!!

Willards List of Completed Projects. 9/8/16

Date Found	DESCRIPTION OF DEFICIENCY	Order of Hazard	Planned Date of Correction
12/16/15	Dead-End Flushing Program: The local fire department conducts some of the dead-end flushing for the Water District. The Water District needs to develop a program for tracking the dead-end flushing that the fire department conducts in order to track flushing of the dead ends and maintain accurate records of the program.	D	
12/16/15	Cross-Connection Control Survey: It is noted that last cross-connection control survey was conducted on April 30, 2014, by Monte A. Raines from Kern Plumbing & Backflow Services, Inc. and findings of the survey were summarized in a report dated June 5, 2014 (copy enclosed). The report recommended installing several new backflow prevention assemblies. Within 30 days of the sanitary survey letter, the Water District should notify the State Board of improvements made and actions taken in response to the 2014 cross-connection control survey report.	D	
12/16/15	Valve Exercise Program: System valves need to be located, identified and exercised. Currently, there is no valve exercise program. It is recommended that the Water District develop a valve exercise program.	N/A	
12/16/15	Tank Inspection and Maintenance Program: The Water District needs to develop a tank inspection and maintenance program. The tanks must be inspected a minimum of once every five years.	D	

ORDER OF HAZARD

- A. CRITICAL HEALTH HAZARD CORRECTIVE ACTION MUST BE TAKEN IMMEDIATELY
- B. SERIOUS POTENTIAL HEALTH HAZARD ACTION MUST BE TAKEN AS SOON AS POSSIBLE
- C. POTENTIAL HEALTH HAZARD MUST BE CORRECTED AS WORK LOAD PERMITS
- D. SYSTEM OR OPERATIONAL DEFECT RESULTING IN POOR WATERWORKS PRACTICE N/A. NOT APPLICABLE
