BOIL WATER NOTICE

Boil Your Water Before Drinking or Food Preparation to Avoid Illness

Due to a water main leak, which will be repaired on August 27, 2020 the State Water Resources Control Board, Division of Drinking Water, and the Lebec County Water District Water System are advising customers located in the Lebec Zone (Circle Drive, Canyon Drive, South Drive, North Drive, Karr Drive) to only use boiled tap water or bottled water for drinking and cooking purposes as a safety precaution to avoid stomach or intestinal illness.

We will inform you when tests show that water is safe to drink and you no longer need to boil your water. We anticipate resolving the problem by August 28, 2020.

If you have questions about other uses of tap water, such as bathing and dish washing, please call Lebec County Water District or read this guidance:

<https://www.cdc.gov/healthywater/emergency/dwa-comm-toolbox/before/tools/What-to-Do-During-a-Boil-Water-Advisory.docx>

Date Issued: 8-27-20

Jessica Carroll, Manager

Lebec County Water District

Do not drink the water without boiling it first

- Boil all water for one (1) minute (rolling boil).
- Let water cool before drinking.
- Use boiled or bottled water for drinking, brushing teeth, and food preparation until further notice.
- Boiling water kills bacteria and other organisms in the water.

If you are unable to boil your water:

Household unscented liquid bleach

- For clear water, use 8 drops (1/8 tspn.) of bleach for 1 gallon of water. For cloudy water, filter through a clean cloth and use 16 drops (1/4 tspn.) of bleach for 1 gallon of water.
- Mix well. Allow to stand for 30 minutes before using.
- Water may taste or smell like chlorine. This means disinfection has occurred.

Water disinfection tablets

- Please follow the manufacturer's instructions.

If you are concerned about your health or the health of a family member, contact your health care provider.
