### Disinfection Byproduct Monitoring and Reporting (DBPR) Requirements Not Met for Lebec County Water District Water System During 2016

Our water system failed to monitor as required for a drinking water monitoring standard during 2016 and, therefore, was in violation of State regulations. Even though this failure was not an emergency, as our customers, you have a right to know what you should do, what happened and what we did to correct this situation.

#### What happened?

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. We did not monitor or test for disinfection byproducts as required in 2016 and therefore cannot be sure of the quality of our drinking water during that time.

#### What should I do?

- There is nothing you need to do at this time.
- The table below lists the contaminant we did not properly test for during the last year, how many samples we are required to take and how often, how many samples we many samples we took, when samples should have been taken, and the date on which follow-up samples were (or will be) taken.

| Contaminant   | Required sampling frequency    | Number of samples taken | When all samples should have been taken | When samples were or will be taken |
|---------------|--------------------------------|-------------------------|---|------------------------------------|
| TTHM and HAA5 | Minimum is one sample annually | None                    | During calendar year 2016               | 2017                               |

- If you have health issues concerning the consumption of this water, you may wish to consult your doctor.

#### What was done?

We plan to collect the required DBPR samples in 2017 in accordance with our ST2 DBPR Monitoring Plan. For more information, please contact Michael Hightower, Board President with Lebec County Water District at phone number 661-248-6872 or mailing address P.O. Box 910, Lebec, CA 93243. You may also contact the State Water Resources Control Board, Division of Drinking Water at (661) 335-7315.

*Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.*

#### Secondary Notification Requirements

Upon receipt of notification from a person operating a public water system, the following notification must be given within 10 days [Health and Safety Code Section 116450(g)]:

- **SCHOOLS:** Must notify school employees, students, and parents (if the students are minors).
- **RESIDENTIAL RENTAL PROPERTY OWNERS OR MANAGERS** (including nursing homes and care facilities): Must notify tenants.
- **BUSINESS PROPERTY OWNERS, MANAGERS, OR OPERATORS:** Must notify employees of businesses located on the property.
